Frozen Buffalo Meat: A Quick Guide

Frozen buffalo meat is a popular choice in many countries due to its lean quality, rich protein content, and affordability. India is one of the world's largest producers and exporters of frozen buffalo meat, supplying to markets across the Middle East, Southeast Asia, and Africa.

What is Frozen Buffalo Meat?

Buffalo meat, also known as carabeef, comes from water buffaloes. It's lower in fat and cholesterol compared to beef, making it a healthier red meat option. Once processed, the meat is quickly frozen to preserve freshness, flavor, and nutritional value during storage and export.

Shelf Life of Frozen Buffalo Meat When stored at 0°F (-18°C) or below, frozen buffalo meat can last up to 12 months without significant loss of quality. Proper packaging and cold chain management are essential to maintain its shelf life during transportation and storage.

Frozen Buffalo Meat Exporters in India

India is home to several frozen buffalo meat exporters that meet international quality standards such as HACCP, Halal, and ISO certifications. These exporters supply various cuts—like forequarters, hindquarters, and boneless meat—to global markets.

If you're looking for reliable [frozen buffalo meat exporters in India](#), make sure to verify:

- Plant registration and certifications
- Cold chain logistics capability
- Export experience to your target country
