orbi ™

Quick Start Guide

NETGEAR®

1. Connect Your Orbi Router

Modem

Unplug your modem and remove and replace the backup battery if it uses one. Plug the modem back in.
Use the included Ethernet cable to connect your modem to the yellow Internet port on your Orbi router.

Note: If you want to connect your Orbi router to an existing gateway, we recommend that you turn off your existing gateway's WiFi.

Connect your Orbi router to a power source. The Power LED on the back of the Orbi router lights green. If the Power LED does not light, press the **Power On/Off** button.

Wait for the Orbi router's ring LED to light white.

2. Place Your Orbi Satellite

Orbi satellite

Orbi router

Place the Orbi satellite in the middle of your house to get the best WiFi coverage.

Connect the Orbi satellite to a power source. The Power LED on the back of the Orbi satellite lights green. If the Power LED does not light, press the **Power On/Off** button.

The Orbi satellite's ring LED lights white while the satellite attempts to sync with the Orbi router.
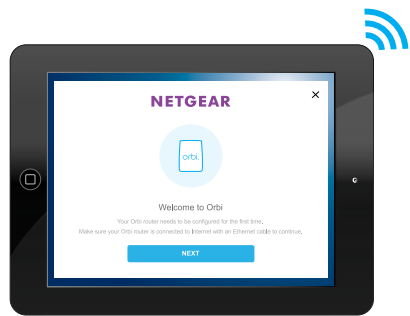

2. Place Your Orbi Satellite (Continued)

After the Orbi satellite's ring LED lights white, it lights one of the following colors for about three minutes and then turns off:

● **Blue**

The connection between the Orbi router and Orbi satellite is good.

● **Amber**

The connection between the Orbi router and Orbi satellite is fair. Consider moving the Orbi satellite closer to the Orbi router.

● **Magenta**

The Orbi satellite was unable to connect to the Orbi router. Move the Orbi satellite closer to the Orbi router.

Note: If the ring LED still lights magenta after about one minute, press the **Sync** button on the back of the Orbi router and on the back of the Orbi satellite. If the Orbi satellite successfully syncs with the Orbi router, the satellite's ring LED lights white then lights blue to indicate a good connection, and then turns off.

3. Set Up Your Orbi Network

Connect your computer or mobile device to the Orbi router or satellite with an Ethernet or WiFi connection.
To connect with WiFi, find the preset WiFi network name (SSID) and password on the label on the Orbi router or satellite and connect to that network from your WiFi-enabled computer or mobile device.

Launch a web browser and visit *orbilogin.com*. If a login window opens, enter the user name and password. The user name is **admin** and the default password is **password**.
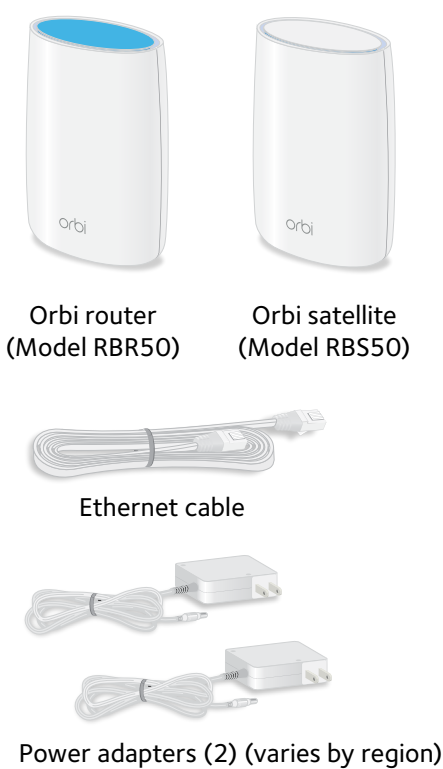

Follow the onscreen instructions to set up your Orbi network.

The Orbi router's ring LED turns off after the setup is complete.

All Set Up!

Package Contents

Orbi router
(Model RBR50)

Orbi satellite
(Model RBS50)

Ethernet cable

Power adapters (2) (varies by region)

Orbi Router Overview

orbi

1. Ring LED (not shown in image)
2. Sync button (also used for WPS connection)
3. Internet port (the Orbi satellite does not include an Internet port)
4. Ethernet ports

Orbi Satellite Overview

orbi

5. USB port
6. Power On/Off button and Power LED
7. DC Power connector
8. Reset button
